

Virtual App Commands

`myapp.cameyo.exe [-modifiers] -command`
e.g.: `myapp.cameyo.exe -quiet -remove`

Basic Commands

Remove app's cache & data, e.g.:	-Remove
<code>myapp.cameyo.exe -quiet -remove</code>	
Remove app's cache & data, and delete executable	-RemoveSelf
Stop app's running processes	-Stop
Execute in app's context, e.g.:	-Exec command
<code>myapp.cameyo.exe -exec cmd.exe</code>	
<code>myapp.cameyo.exe -exec "c:\myapp.exe" /someparam</code>	
<code>myapp.cameyo.exe -exec #1</code>	
Explore app's virtual repository	-JumpTo
Start app in safe mode (for diagnostics purpose)	-SafeMode
Commit app's local changes back to package	-Repackage
Run installer from the package context and commit	-Patch install.msi

Package Information

Display package information on screen	-Info
Save package information in file	-InfoLog
Display virtualization engine version	-EngineVer
Display currently running app's processes	-ProcessList
Generate virtualization diagnostics log	-Troubleshoot

System Integration

Integrate app's shortcuts & associations	-Integrate
Same, but first copy the virtual exe locally	-FullIntegrate
Recreate app's shortcuts in one directory	-CreateShortcuts

* Licensed versions only

Cameyo Commands

`Cameyo-2.7.1249.exe [-modifiers] -command c:\myapp.cameyo.exe`
e.g.: `Cameyo-2.7.1249.exe -exportproperties c:\myapp.cameyo.exe`

Package Manipulation

Modify package properties, e.g.:	-SetProperties:p=v
<code>-setproperties:virtmode=disk c:\myapp.cameyo.exe</code>	
<code>-quiet -setproperties:virtmode=disk,,prop2=value2 c:\myapp.exe</code>	
* Export package properties	-ExportProperties
* Export, including build-specific properties	-ExportAllProperties
* Import XML package properties	-ImportProperties:file.xml

Package Creation

Start package capture	-StartCapture
End capture and create package (repeatable)	-EndCapture
* Build package from XML file	-BuildPkg file.xml
Capture an installation directly into package	-GhostCapture installer.msi
Define output pkg name (optional modifier)	-OutputExe:pkg.exe
Create a new, blank package	-CreateNew:appid pkg.exe

Modifiers (Virtual App & Cameyo commands)

Quiet mode	-Quiet
Password (required for protected packages)	-Password:xyz

Basic Package Properties & Environment

App's unique identifier	AppID
Env variable (query):	CAMEYO_RO_APPID
Env variable (modify):	CAMEYO_APPID
Virtual repository path	BaseDirName
Env variable (query):	CAMEYO_RO_BASEDIRNAME
Env variable (modify):	CAMEYO_BASEDIRNAME
Virtual executable path	CarrierExe
Env variable (query):	CAMEYO_RO_CARRIEREXE
